PROFESSIONAL EXPERIENCE:

WAREHOUSE GENERAL MANAGER.....
..... **2013–Present**

Earning \$103K + 20% (~1,000 employees here)

- Manage and oversee all aspects of warehousing, transportation and distribution, shipping/receiving, inventory management, policy/procedure development, safety management and team management/training for multiple departments, while driving continuous improvement and utilizing Six Sigma/5S business practices to streamline/optimize all assigned areas including safety as a priority. Continuously leverage Lean/Six-Sigma to increase efficiencies and improve the bottom line for financial prosperity.
- Created and implemented JSA/JHA to help integrate accepted safety practices for each job.
- Serve on the P&L, RF Integration, Safety and Microsoft AX committees; successfully applied Lean initiatives to warehouse production processes to increase cases per hour while being safe.
- Create and implement best practice logistics principles, policies and processes across the company to improve safety, operational and financial performance.
- Develop daily work logs and all related warehousing documentation; audit daily labor and billing reports.
- Partner in the planning, managing and evaluation of logistics processes, while liaising with headquarters, internal stakeholders, suppliers, logistics providers, transportation companies and customers.
- Manage all areas of warehouse safety and drove compliance with OSHA; decreased safety incidents by 98.11%.
- Review and manage purchase orders for warehouse maintenance and

fruit orders from multiple vendors.

- Created a new layout for warehouse to better streamline FIFO and ensure customer satisfaction on all orders. As well creating a safe environment for associates to work in.
- Provide annual budget/expense reporting, monitor expenditures, identify variances and implement corrective actions; identify deficiencies and implemented cost reduction initiatives to drive savings.
- Manage the interviewing, selection, orientation, training, scheduling, evaluation and performance of staff.
- Directly oversee daily inventory processes by scheduling materials to be moved to and from warehouse; coordinate all inventory transfers and audits; compare information against bills of lading, invoices and orders.
- Manage all international orders, to include working with Customs to ensure importing/exporting compliance with USA and other countries regulations and standards.
- Ensured that relations with 3PL carriers, work in a safe manner by creating ways to interact with them to show that we care for their safety as well.

Happy, but he and his wife are eager to move south

LOGISTICS MANAGER.....
..... **2001-2013**

Earning \$75K + 25% bonus + \$5K in stock

- Managed and led the execution and coordination of all general warehousing, transportation and distribution logistics matters within the organizations distribution center, to include overseeing the scheduling and tracking of all inbound/outbound shipments in the most efficient, timely and cost effective manner, developing/managing logistics reporting and KPIs, monitoring logistics performance and overall costs, and coordinating shipments with customer service and supply chain to optimize order fulfillment. Led both warehouse and transportation as a safety lead to develop best practices.
- Partner with quality assurance and control to ensure proper inventory attainment, accountability and control.
- Engaged vendors to identify and resolve any product shipping/receiving errors; partnered in the planning and management of logistics processes, while liaising with HQ, diverse teams, internal stakeholders and suppliers.
- Created and implemented best practices, policies and processes

across the logistics organization to improve operational and financial performance, while resolving transportation problems and customer issues.

- Participated in the interviewing, selection, hiring, training and scheduling of talent in accordance to needs.
- Maintained performance and financial reporting responsible areas and continually worked to improve performance and drive cost efficiencies for multiple areas.
- Provided regular reports that communicated team performance, project delivery, progress to milestones and impacts to service delivery; created processes in support of programmatic goals and objectives.
- Oversaw both personnel transitions and PO processing executed by logistics team and multiple departments.
- Conducted staff/worker observations to evaluate performance and identify areas of weakness or those in need of improvement; facilitated all aspects of training and development.
- Managed logistics-related documentation maintenance and continuous improvement to ensure business continuity and standardization.

Left when recruited by a different firm
